Arete PRIME VALUES Income (A, EUR)

ethical investment fund

Investment objective

Arete PRIME VALUES Income is a balanced investment fund. The fund's objective is to generate regular income on investment as well as long-term capital appreciation. An independent ethics-committee and a team of specialists is selecting companies with high ethical standards using methods especially developed for this purpose.

Investment strategy

Arete PRIME VALUES Income invests worldwide in bonds and equities, whereby the proportion of equities and equity-like securities held directly or indirectly via other investment funds, together with commodity-related investments, may not exceed 30% of the fund assets. Arete PRIME VALUES Income may also invest in securities whose performance and performance proceeds are dependent on one or more reference values. In particular, international equities and equity-equivalent securities and commodities as well as indices on the aforementioned instruments may be considered as benchmarks. The majority of the fund assets are invested in bonds and equivalent securities, money market instruments as well as sight deposits and callable deposits with a maximum term of 12 months, whereby these investment instruments may be acquired up to 100% of the fund assets. The fund pursues an active management strategy without reference to a benchmark.

Investment ethics – ethics committee

The objective of investment ethics is a safe and profitable, yet at the same time socially and environmentally responsible investment strategy, which is geared towards sustainable, entrepreneurial value creation. Within the context of the investment decision, the fund uniquely combines profound investment research with the results of an analysis of the ethics, which screen every company and every issuer in detail with regard to positive and exclusion criteria. The experts of the independent Ethics Committee monitor the compliance with the defined ethical standards on behalf of the investors.

Performance 10 years (in EUR)
